I possess a diverse skill set in web development, including proficiency in HTML, CSS, and JavaScript, Angular. I have hands-on experience in database design and development and server-side development using PHP or .NET Node. With a strong foundation in these technologies, I am capable of designing and implementing dynamic and interactive web applications. My ability to leverage these skills allows me to create engaging user experiences while ensuring efficient data management and server functionality. I am eager to contribute my expertise to a dynamic team and contribute to the success of web development projects.
